BURWELL CAMERON JAMES

9333 GOBLIN LN EVERETT WA 98208-2427| (269) 266-2201 | burwellcameronjames908@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented AI Data Specialist and Software Developer with 4+ years of experience in AI training data evaluation, content annotation, and full-stack software development. Skilled in Python, Java, JavaScript, and C++ with a strong foundation in algorithmic reasoning and data quality assurance. Proven track record contributing to cutting-edge AI projects across image analysis, code evaluation, search relevance, and conversational AI platforms. Adept at processing high-volume tasks with accuracy and consistency while meeting tight deadlines in fast-paced remote environments.

CORE COMPETENCIES

• AI Data Annotation & Labeling	• Python · Java · JavaScript · C++	• Image Analysis & Visual QA
• Search Relevance Evaluation	• Code Review & Debugging	• Natural Language Processing (NLP)
• Comparative Reasoning & QA	• Remote Collaboration & Async Work	• Data Quality & Accuracy Assurance

PROFESSIONAL EXPERIENCE

AI Data Contributor – Code & Visual Tasks *Jan 2024 – Present*

Outlier AI (Aether Project Category) | Remote

- Complete short, high-accuracy tasks including image description, visual difference detection, and instruction-following challenges for frontier AI model training datasets.
- Evaluate and annotate code snippets in Python, Java, JavaScript, and C++ to support large language model (LLM) code generation improvements.
- Perform side-by-side AI response comparisons, scoring models on accuracy, helpfulness, and coherence using structured rating rubrics.
- Consistently maintain quality scores above platform benchmarks, earning eligibility for higher-tier and specialized task queues.
- Participate in referral incentive programs and contribute to onboarding quality metrics for new contributors.

AI Evaluation Specialist *Aug 2023 – Present*

Mindrift (Toloka Platform) | Remote

- Evaluate AI assistant responses for e-commerce and search platforms (including Shop App AI Assistant), rating on Relevance and Overall Experience using 0–2 scoring scales.
- Generate diverse, natural language search queries across product categories including electronics, clothing, home goods, and specialty items for search relevance ranking tasks.
- Assess conversational AI quality across 80+ unique product-focused query sessions, ensuring breadth and realism in training datasets.
- Follow detailed annotation guidelines and quality rubrics to maintain <5% error rate across all submitted tasks.

Freelance Software Developer & Technical Tutor *May 2021 – Present*

Self-Employed | El Paso, TX (Remote Available)

- Developed web applications and automation scripts for small business clients using JavaScript, Python, and Java; delivered 15+ completed projects with 5-star client ratings.
- Tutored high school and college students in Java, Python, object-oriented programming (OOP), polymorphism, and data structures, improving student exam scores by an average of 25%.
- Designed and tested high-complexity mathematical problems and algorithms for AI training data providers, including floor-function integral problems and nonlinear equations.

- Built custom document generation tools using Python libraries (ReportLab, python-docx) for automated PDF/Word report creation.

Audio Data Collection Specialist *Jun 2023 – Dec 2023*

SHAIP (via Prolific) | Remote

- Recorded high-quality automotive voice assistant wake-up phrase datasets ("Hey Kia," "Gleo," etc.) for training speech recognition AI models.
- Ensured precise pronunciation accuracy and audio clarity standards required for production-grade voice AI training datasets.
- Troubleshot recording environment issues and adapted to platform-specific audio submission requirements.
- Completed assignments ahead of deadline, contributing to a 100% acceptance rate on submitted audio samples.

Research Participant & Data Annotator *Jan 2023 – Present*

Prolific Academic | Remote

- Participated in 100+ academic and commercial research studies covering cognitive tasks, AI feedback collection, survey research, and behavioral studies.
- Provided structured, high-quality annotations and responses used in peer-reviewed AI and psychology research.
- Maintained a 100% approval rate and top-tier participant standing on the platform.

EDUCATION

Bachelor of Science in Computer Science (Focus: Software Engineering) *Graduated May 2021*

University of Texas at El Paso (UTEP) | El Paso, TX

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Discrete Mathematics, Computer Networks, Artificial Intelligence.
- Member of the ACM Student Chapter; completed capstone project building a full-stack web application with Java Spring Boot and React.js.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), C++, HTML5, CSS3, SQL

AI / ML Tools: Outlier AI, Mindrift/Toloka, Prolific, SHAIP, Scale AI workflows

Frameworks & Libraries: React.js, Node.js, Spring Boot, pandas, NumPy, ReportLab, python-docx

Developer Tools: Git/GitHub, VS Code, IntelliJ IDEA, Jupyter Notebook, Postman

Task Types: Image annotation, Code evaluation, NLP rating, Search relevance, Audio collection

Soft Skills: Attention to detail, Self-management, Deadline-driven, Written communication

CERTIFICATIONS & TRAINING

- Google IT Support Professional Certificate – Coursera (2022)
- Python for Everybody Specialization – University of Michigan / Coursera (2022)
- JavaScript Algorithms and Data Structures – freeCodeCamp (2021)
- AI Annotation & Quality Assurance Best Practices – Outlier Onboarding Program (2024)
